

Question 1:

Answer:

In the video Starting research, the librarian highlights two frequently used databases in the Business School: Business Source Complete (EBSCO) and ABI/inform collection (ProQuest). Tips for using Business Source Complete are: We should start by asking questions. Then use one or two keywords that we expect to find in articles about our topic and use logical terms like AND, OR, and * (to find ending terms) to narrow down the topic and find a manageable number of articles, and we can further refine results by limiting our search by published date, peer reviewed, and other criteria. Tips for ABI/Inform: The database has a tip sheet for how to search for articles on a topic, and we should use the tools found in article databases to find the full text, create citations, and save articles.

Question 2:

Answer:

Name:

Name of program: Data Analytics

Program Librarian: Heidi Vix

Surbakti, H., & Fusiripong, P. (2024). An efficient machine learning prediction method for vehicle detection: Data analytics framework. *TEM Journal*, 13(1), 16-25.
